

Y1: DAY & NIGHT

Glossary

light – you need it to see anything

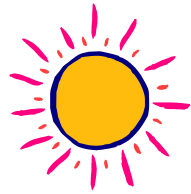

dark – without light

night – when it is night we can not see the sun.

day – the sun is in the sky making everything bright even when it is cloudy.

reflect – light is bouncing back from a surface – a mirror reflects your face.

These are **sources of light**

sun

light bulb

television

lamp

torch

candle

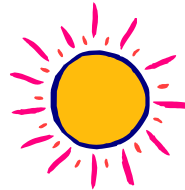

fire

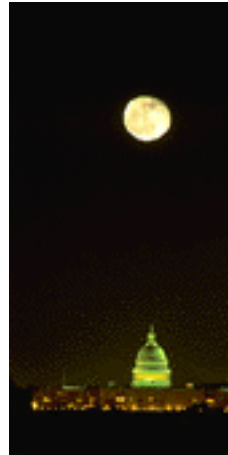

star

Which of these is the **brightest**?

Which is darker?

night

day

Reflective material keeps us safe by reflecting light that shines on it at night.

When might you need to wear reflective strips on your clothes?
